EMPLOYMENT

Full Stack Web Consultant   **Infinite Square, Paris**   **2015 – 2019**

- Built web apps for several clients as a front-end lead or part of a team using mainly React.
- Took part in the implementation of APIs and server-side websites using ASP.NET.
- Advocated React inside the company and coached clients on how to use React.
- Lead React and ALM (agile, git, branching, testing, etc.) coaching sessions in training centers.
- Took a 1-year break to work in Japan for a year.

Latest significant project:

TalentSoft, 5 months

- Joined TalentSoft's dev team as lead front-end developer for a new project from design to production.
- Set up the project's architecture: React, Redux, TypeScript, Sass, Jest, Webpack, etc.
- Implemented design and features while testing components and actions.
- Improved the client's React components library and suggested guidelines.
- Successfully deployed on production server on time.

Full Stack Web Developer   **Forcia, Tokyo**   **Jan. 2018 – Dec. 2018**

JTB, https://www.jtb.co.jp/

- Implemented front-end features in JS on the "Domestic Travel" tab of the current JTB reservation website.
- Set up an integration and UI testing environment in JS (Jest, Puppeteer) with continuous testing pipelines.

Research & Development Team

- Worked on improving the company's custom search engine used to develop the clients' websites.
- Implemented Python scripts to generate Japanese quasi-synonym dictionaries and word-splitting dictionaries using a client's products database as input.
- Eased the management of those dictionaries by creating a "Dictionary Manager" application using React/Express.js in Typescript.
- Helped the company transition into being more Agile, testing more and better, using React and Typescript, and so on.

EDUCATION

Strasbourg, France   **CESI**   **2010 – 2015**

- Master's degree in Computer and Information Science, August 2015.
- Coursework: Operating Systems; Databases; Algorithms; Programming Languages; Entrepreneurship; Project management; Agile; ALM
